Engineered Solutions **Concept to Delivery**

- ▲ Project Management ▲ Design & Manufacture of Press Tools
- ▲ Metal Pressings Assemblies ▲ Press Tools ▲ Welding & Fabrication
- ▲ CNC & Manual Machining ▲ EDM Wire Erosion
- ▲ Total Quality ▲ Metal Pressings

We Will Manage Your Project From Design to Delivery

Using SolidWorks 3D design, as well as computerised scheduling, multi-stage progression tooling and resource management Hilltop Engineering will accurately match your requirements to the appropriate capacity.

Unmatched Metal Pressing Services that Meet Your Requirements

Our press Shop can produce a wide range of parts in all metals, from small single operation presses to a recently purchased 160 Tonne twin ram Yangli with Mork computerised coil feed and flattening, capable of running complex progression tools.

Championing Industry Excellence with Comprehensive Services

We offer a broad spectrum of services, meticulously designed to meet the demands of various industries including metal pressing tool services, maintenance, and contract tool making to in-die tapping, single operation tooling, and tool try out facilities.

Welding & Fabrication

Consistent High Quality Mig & Tig Welding Capabilities

At Hilltop Engineering, we have both MIG and TIG welding capabilities and work with a wide range of material, including mild steel, tool steel, stainless steel, aluminium and more. Our services cover anything from secondary operation welding on pressed parts, bespoke fabrications and tooling repairs.

Total Quality

From Concept Designs to Completion

Full traceability and release documentation is available, all in line with our ISO 9001 : 2015 accreditation. As a first tier supplier to the automotive industry, we are well versed in the completion of APQP, PPAP and PSW documentation.

CNC Machining

Sub Contract Facility Manufacturing To Your Specifications

Hilltop Engineering is well equipped with a full range of equipment including CNC machining, EDM Wire Erosion and Turning. We can carry out a comprehensive in-house service on Machined or Turned components, Machined Fabrications and Assemblies, Sub Contract EDM Wire Erosion and General engineering.
